Career Objective

Proactive Computer Science undergraduate with practical experience in designing and engineering Production ready web applications ,AI-powered systems, and intelligent chatbot integrations. Strong foundation in scalable system design and algorithmic problem solving.

Education

IMS Engineering College

B.Tech (CSE)-7.6

July 2023-July 2027

Ingraham Institute English school ,Ghaziabad

Intermediate - 74%

July 2022-July 2023

Ingraham Institute English School ,Ghaziabad

High School - 86%

May 2020-May 2021

Experience

- Competed in national coding & hackathons: Code Slayer 2K25 (NIT Delhi),InnovateNSUT'26 (NSUT).
- Solved complex algorithmic problems using strong DSA,debugging & optimization skills.
- Hands-on exposure to Generative AI, LLM tools & prompt engineering via AIQrew(Google Gemini Ambassador).
- Coordinated Logo Designing event at college Tech Fest; secured top position for creativity.
- Trained in consulting tools ,structured problem solving & business analysis(Jaypee Business School).

Technical Skills

- **Programming:** Data Structures and Algorithms,OOPS,DBMS ,OS.
- **Languages :** Java,Python,JavaScript,HTML,CSS,MySQL.
- **Frameworks:** ReactJS(Library),NodeJS,Express,Mongoose,MongoDB Atlas,Tailwind CSS,Bootstrap.
- **Technologies:** Firebase,Gemini,API.
- **Skills:** Agentic AI APIs,Web Development Git,GitHub,Canva.

Projects

SmartQueue | React,TypeScript,Vite, Tailwind CSS,Supabase

- Engineered a smart token-based queue management System to eliminate overcrowding and improve service efficiency.
- Designed digital token generation and real-time queue tracking for streamlined public service operations.
- Implemented secure authentication and scalable backend integration using Supabase.
- Built a high-performance,fully responsive UI using modern React and reusable component architecture.

[GitHub-SmartQueue](#)

VeloraAI | Node.js,Express.js,MongoDB,EJS,Tailwind CSS

- Built an AI powered travel automation platform for intelligent journey planning, unified booking management.
- Architected a secure scalable backend architecture using Express.js , MongoDB and RESTful APIs.
- Developed a responsive ,glass-inspired UI and host dashboard enabling users to publish experiences and generate real earnings.

[GitHub-VeloraAI](#)

SBI-ATM |Java ,Swing,JDBC,SQL

- Constructed a secured desktop-based banking application to simulating real world core banking operations.
- Implemented deposit,withdrawl,balance enquiry,mini statement,PIN management features.
- Integrated JDBC with SQL database for reliable and high-performance transaction processing

Certifications

- Innovation Challenge Participant-InnovateNSUT'26, NSUT Delhi-[Certificate](#)
- Secured 2nd prize in Logo Designing Competition(2025)- [Certificate](#)
- Competitive Coding Participant-Code Slayer 2K25,NIT Delhi-[Certificate](#)
- Certified in Consulting tools and Strategy , Jaypee Business School- [Certificate](#)
- AI Community Contributor-AI Qrew, Google Ambassador Program-[Certificate](#)
- Achieved 3rd prize in Chess Zonal,CISCE National Sports & Games(2022)-[Certificate](#)
